

Start

```
graph TD; Start([Start]) --> ROI[ROI-Auswahl]; ROI --> TM[Template-Matching]; TM --> SPI[Sub-Pixel-Interpolation]; SPI --> SM[Suche des Maximums]; SM --> Ende([Ende]);
```

The flowchart illustrates a sequential process for template matching. It begins with a 'Start' node, followed by 'ROI-Auswahl', 'Template-Matching', 'Sub-Pixel-Interpolation', 'Suche des Maximums', and finally 'Ende'. Each step is connected to the next by a downward-pointing arrow.
